

Senior Ruby Engineer at Giv.to

Description: Giv.to was founded in June 2009 by an acclaimed campaign fundraiser and an expert in cross-site and social network analytics. We build tools that revolutionize the way political campaigns, non-profits and causes raise money and engage with supporters over online social networks. Currently self-funded, Giv.to launched its first product in early 2010. With several key partnerships and a growing base of paying customers, Giv.to is looking forward to an exciting 2010. We are searching for talented, creative Ruby engineers looking to collaborate with a fast-paced, growing team of entrepreneurs.
